

TECHNICAL SPECIFICATIONS AND BASIC CHARACTERISTICS

K100 Semi-automatic pistol calibre 9x19mm Luger

Main Characteristics: The K100 semi-automatic double-action pistol chambered for cartridge 9x19mm “Luger” is designed especially as the perfect solution for close individual protection and mainly suited for Law Enforcement, Special service and Military utilization with robust and reliable design with using sturdy materials as a product of Slovak company Grand Power. The breech mechanism of this S-A pistol is locked pistol type and its up-to-date design and construction is simple, reliable and easy and fast to disassembly, cleaning and assembly back. Due to its simple modern construction and solid design this pistol is intended for hard operational conditions and can withstand harsh manipulation as well. Shooting with this pistol is very easy and accurate to standard practical range up to 60 m with maximum effective range of approx. 150 m. Pistol is made from high-quality modern materials and very reliable during shooting. Its empty weight is only 0,82 kg with 15-round empty detachable box magazine (0,96 kg with fully loaded magazine), length only 203 mm with barrel length 108 mm what gives to pistol muzzle velocity 330 m/s. Sights of pistol are mechanical, blade front and notch rear (side adjustable).
