

TECHNICAL SPECIFICATIONS AND BASIC CHARACTERISTICS

STRIBOG SA-9 Submachine gun calibre 9x19mm Luger

Main Characteristics: The STRIBOG SA-9 submachine gun is mainly designed as the ultimate solution for close protection, available in semi-automatic and fully-automatic version for Law Enforcement and Military usage with robust and reliable design with using sturdy materials as a product of Slovak company Grand Power. The core of SA-9 submachine gun consists of dynamic blowback dual mass bolt, which reduces recoil energy and is very easy to disassemble. The submachine gun SA-9 is chambered for 9x19mm "Luger" cartridge, has empty weight only 2,65 kg with 20-round empty detachable box magazine (2,87 kg with fully loaded magazine), length only 485mm (747mm with unfolded stock) with barrel length 254 mm what gives to this SMG muzzle velocity 340 m/s. Due to used modern ammunition and high quality materials including chromium molybdenum steel its maximum effective range in semi-automatic mode is approx. 300 m with maximum accuracy range against staying human figure 200 m. In fully-automatic mode real accuracy range of the weapon is approx. 150 m. Sights of SMG are mechanical, blade front and notch rear (side adjustable). Its construction is simple, reliable and easy and fast to disassembly, cleaning and assembly back. Due to its simple modern construction and solid design this SMG is intended to hard operational conditions as well.
